

Satori Virtual Science and Engineering Fair

SARSEF and AZSEF

OUR CONNECTION TO THE WATER CYCLE

Dear Satori Scientists & Families,

This year the Satori Science and Engineering Fair is being held virtually February 10-11. The SARSEF organization will provide a platform for Satori to host our Science and Engineering Fair virtually. Satori winners are eligible to advance to SARSEF and to AZSEF.

The Southern Arizona Science and Engineering Fair (SARSEF) has been an important part of Satori culture for a long, long time, and each year our Satori scientists have had a lot of fun and success developing fun and unique research projects (and winning prizes!).

AZSEF is the state Science Fair managed by the Arizona Science Center.

Our suggested theme this year is: OUR CONNECTION TO THE WATER CYCLE

Students and classes are invited to use this theme as an inspiration; however, it is optional.

Timeline:

- January 7: Let us know if you are planning to participate. Email: betsy@satorischool.org
- February 9: Projects Due
- February 10-11: Satori Virtual Science and Engineering Fair
- February 28 – March 5: SARSEF
- March 28 – April 2: AZSEF

Satori teachers may complete projects with their class, and individual students are invited to plan and complete a project independently outside of school hours if they choose to participate. I am available to provide advice and guidance. We also have veteran SARSEF families who are willing to provide mentorship. Let me know if you are interested.

If you are planning to or just interested in participating this year, send me an email so we can work together to help your student. If you have questions, comments or suggestions, please email betsy@satorischool.org.

For more information on regional science fairs or for general information about designing a science or engineering project, check out the resources below.

Thank you!

Betsy
